## About me

I am a Ph.D. student in Crop Protection (Weed Science), expected to graduate by March of 2021. My research scope includes tank-mix interactions, resistant weed management, and data analysis. I have been advised by Dr. Caio A. Carbonari and Co-advisor by Dr. Greg R. Kruger. The title of my thesis for my Master's degree is The Effect of glyphosate on the growth and reproduction of *Digitaria insularis*. My undergraduate focus was in agronomy and I was advised by Dr. Dionísio L. P. Gazziero, in the following lines of research: resistance of weeds to herbicides and weed management in soybeans. I also had experience with Junior Enterprise and Research as an intern, where I found my passion for agronomic research. Since then, I feel very keen to pursue a career in research, science, and industry, dedicating my entire academic life to contribute to those subjects.
